

HOTEI ENERGY SHARE TOKEN (HEST)

BINANCE SMART CHAIN (BEP20) – SMARTCONTRACT

March 2022.

Version 2.0

ABSTRACT

Hotei Energy Share Token (HEST)TM© is a token created and published on the Binance Smart Chain (BEP20) network, whose objective is to serve as economic support for the development of the activities, products, goods and services of the startup Hotei Energy BV. TM©; With the dividends generated by the purchase/sale of this token, the company obtains capital for the development of its objectives and thus invests it in the following activities: Development of Prototypes for process improvements in the work areas in which Oil, gas and other renewable and non-renewable energy sources, as well as Acquisition of Goods, services and the like to offer them to potential clients in the energy area. The economic support of the Hotei Energy Share Token (HEST) TM © is obtained through the transactions resulting from its digital exchange, as well as by billing for the provision of goods and services of

the company Hotei Energy BVTM©, which allocates a variable percentage for profits from its billing to maintain the operation of the Hotei Energy Share Token (HEST), the dividends injected into the token are obtained through real work contracts in execution and thus, it contributes to the economic growth of the token, allowing the equitable distribution of the dividends generated among the holders through MiniPools of fixed percentage and defined limits based on the investment range of the holders. The settlement periods are established for thirty continuous days and the entire value allocated to each MiniPool is settled in this period of time, thus providing a constant source of liquidity not only for the token but also for its participants.

OBJECTIVE

To be a stable, reliable, transparent and secure solution in the fluctuating environment of crypto assets, breaking the traditional reinvestment/burn scheme, providing liquidity periodically to token support the value of (the Hotei Energy Share Token) of stable cryptocurrencies (USDT / BUSD) thus sharing income from Hotei Energy BVTM© billing

equitably depending on the investment amount of the holders, in a transparent and decentralized manner.

RANGE

The Hotei Energy Share Token manages to unite centralized and decentralized finance (DeFi) which seeks to establish itself as an asset on the Wall exchange

Street and Nasdaq, as well as through exchange platforms accessible to anyone in the Crypto market through the company Hotei Energy BVTM©

TOKENOMICS

Contrato: 0xd30bE5B40c443888B4D978638f92Df57308680d8

Network: BEP20 (Binance Smart Chain)

Main coin: Hotei Energy Share Token (HEST) TM©

Secondary coins: USDT or BUSD

Total supply: 1.000.000.000,00

Initial sale value: USD 0.1

Initial pre-sale value: USD 0.085

Initial MarketCap: USD 41,650,000.00

Circulating Supply: HEST 490,000,000.00

Anti-whales system: than 0,1% of totalsupply.

TOKEN DISTRIBUTION & ALLOCATION

The distribution of the tokens is made of the following way:

Graph (b) distribution market allocation – HEST

Participants	Holders Distribution	BALANCE (HEST)
Owners	51%	510.000.000
Digit Holders	39%	390.000.000
Partnership	9%	90.000.000
Team	1%	10.000.000

Table 1. Percentage distribution - HEST

The balances have a predefined characteristic, which behaves as follows:

- **Owners:** this balance belongs to the creators and designers of the company. Sharetokens assigned to owners are restricted and locked for life; may not be sold or released digital merchandising; the profits received towards this balance to provide economic support in the value of the token; This lock serves to avoid devaluation of the token and serve as a

warranty for Hotei Energy BV™© in the future.

- **Digit Holders:** This value is intended for digital marketing and to receive the benefits established by Hotei Energy Share Token, its commercialization is destined under the following modality:

- **19.5% (195,000,000 HEST) Decentralized finance:** to be commercialized freely for availability on decentralized exchanges.

- **19.5% (195,000,000 HEST) Centralized finance:** to be marketed in Centralized Exchanges.

- **Partnership:** It is mainly aimed at marketing, sponsors, sponsors, partners, private investors, joint-ventures that decide to contribute early with Hotei Energy Share Token, these actions receive profits from the payments that Hotei Energy BV™© introduces in the

SmartContract

- **Team:** this review is aimed at the pioneering members of the team; these actions receive earnings from the payments that Hotei Energy BV™© enters in the SmartContract

FUNCTIONALITIES

Launch value HEST (pre-sale): the estimate of the pre-sale value during the IDO is fixed at 0.085 USD/ HEST.

Launch value HEST (sale): the estimated value 0.1 USD/ HEST

Purchase: users can purchase the number of tokens they want based on their value in USD at the exchange rate, the purchase commission is set at 3%.

Sale: the token has an active anti-whale system which prevents submitting sales orders greater than 0.1% of the total supply, the commission is set at 2%.

Distribution pools: these pools receive a % of the returns that Hotei Energy BV™© deposits in cryptocurrencies to the Hotei Energy Share Token SmartContract; they are designed to equitably distribute the returns produced by Hotei Energy BV™© among the Holders' classification (Owners, Digit Holders, Partnership, Team) based on the initial percentage of distribution.

Stake: the stake function is applied through the DAPP of the Hotei Energy Share token (future integrations with third parties); Based on the % of distribution of profits directed to the digit holders (39% of the total supply), this value is subdivided into 8 MiniPools with a predefined % of distribution based on the HEST Balance of the participants. A

Then graphically configure the MiniPools:

Chart (c) Percentage Distribution - Total Supply Vs. MiniPools.

- **Stake - MiniPools:** they are intended to encourage and maintain investment in Hotei Energy Share Token (HEST) and, in turn, distribute equitably among the Holders the deposits made periodically and regularly by Hotei Energy BV™©; to these MiniPools is applied

some principles of decentralized finance based on the objectives of the Hotei Energy Share Token (HEST)™© project. The MiniPools are classified according to the following table:

MiniPool Name	Balance range (HEST)	% MiniPool
Prestige	176,000 - ABOVE	25%
Plus (1)	100,000 – 120,000	20%
Plus (2)	58,000 – 90,000	20%
Advantage (1)	35,000 – 40,000	10%
Advantage (2)	19,000 – 28,000	10%
Advance (1)	9,000 – 12,000	5%
Advance (2)	2,500 – 5,000	5%
Advance (3)	25 -1,500	5%

Table 2. Percentage distribution - MiniPoolHEST

Graph (d) Stake percentage distribution - MiniPools.

Stake Operation – MiniPool: Hotei

Energy BV™© notifies the entry of a deposit to the SmartContract, from this moment the stake is enabled, which, in principle, is conditioned to a counter in reverse time; From the administration of the DAPP, a registration period is enabled in the MiniPools, whose maximum registration period is 48 hours, this registration period is enabled and closed simultaneously for all the MiniPools; the system displays the amount of money to

distribute distributed according to the percentages of each MiniPool; During this period, users can sign up and add HEST balance to their pools.

interest based on the user balance ranges that each MiniPool supports, all stake transactions request a network confirmation to be registered. At the end of 48 hours from the start of the registration period, the system disables registrations in the MiniPool, and totals the amount placed by wallet address separately in each MiniPool and compares it with the closing value of the Hotei Energy Share Token (HEST) , thus determining the total sum of HEST invested by subscribed users of each MiniPool, and its equivalence in USD, as well as the closing value of the HEST with respect to the US dollar (USD).

$$() = () \tilde{y} (39\%) \tilde{y} (\%)$$

$$() = \tilde{y} (\text{ @ })$$

$$() = \tilde{y} (\text{ @ })$$

With these two values determined, we proceed to calculate the percentage of investment per user in the MiniPool, in this way the system gives greater reward to people who reach the maximum limit of each MiniPool, in case all participants reach the maximum of each MiniPool the system

will award the same average reward among all participants.

$$\% () = \frac{\tilde{y} 100}{}$$

The deposits generated by Hotei Energy BV™© are settled in full within 30 days, allowing users to withdraw all or part of these on a daily or monthly basis.

returns produced in stake for the

users do not accumulate back in the balance of the MiniPool; the user is obliged to withdraw or reinvest these returns in order to return to sign up for the MiniPool.

$$() = () \tilde{y} ()$$

Balances per day are calculated based on the following equation:

$$() = (\overline{30})$$

Example: Next, a demonstrative exercise will be carried out, considering the following premises:

- HEBV (This. Deposit): USD 120,000
- Population: 10 registered users
- Mini Pool: Advantage (1) 10%.
- USD amount to share: USD 12,000
- HEST value at close: USD 0.085

The DAPP Closes the registration period when the timer reaches zero, sets the value of the Hotei Energy Share Token (HEST), calculates the value to distribute to the MiniPool (A) and performs calculations B and C respectively, yielding the values shown in the following table:

N° USER	WALLET ADDRESS HEST	STAKE BALANCE HEST	PRICE EQUIV @ 0.085HEST/USD	% USD (User Balance/USD MiniPool Reward)
1	0x1C8B0FD103E9...	40,000.00	3,400.00	10.74
